What intents did our EMPACTS project include?

* Community: By initiating a holiday themed recipe we encouraged the preschool children’s families to create and interact to build new traditions.

* Curriculum: As a team we have developed relationships between ourselves to promote teamwork and encourage each other to succeed by relying on our peers when needed. At the end of our EMPACT project, we gained knowledge of creating informative materials for distribution and lecture.

* Technology: Throughout our project we used different technology equipment. We used a camera to take pictures, then used a computer to generate the slide show.

* Skills: As a team, we communicated via email, phone conversations, and scheduled meetings.

Recipe

1. Take 1 graham cracker and use a plastic knife to spread the icing on the cracker.
2. Make 1 nose with the peppermint Hershey kisses.
3. Make a mouth using 5 of the M&M candies.
4. Enjoy!
Holiday Treats

Our group has done a project in a Pre-K classroom allowing children to make holiday treats. The children learned how to follow a simple recipe, utilizing basic math skills. Reasoning and comprehension skills were used as well as time management.

Objectives

The children learned how to follow a simple recipe, which will help them in the future with instruction following skills.

The students also used math to count out the numbers of different ingredients they were to use. After they were finished with their treat, the children were given a short question sheet to answer. Completing this worksheet helped them remember the skills they learned while doing the project.

EMPACTS is a program designed to get students to become familiar with different ways to interact with each other and other professionals.

This project intends to help develop math, reasoning, and comprehension skills for preschool children and help develop planning, time management, and professional interaction for the students of EMPACTS.

What is EMPACTS?

- Educationally
- Managed
- Projects
- Advancing
- Curriculum
- Technology, and
- Service
