Our goal and mission is to raise awareness about a great organization here in Benton County called the Children's Advocacy Center of Benton County.
It is very important for the community to be aware of the hundreds of raped, beaten and neglected children that live in the Northwest Arkansas area.
The Naked Truth

1,507 reported child sexual abuse cases in Benton County in 2007

In 2000, Arkansas had over 17,000 abuse cases opened. Benton, Washington, Carroll and Madison counties accounted for 2,014 of those. Pulaski County ranked highest with Benton County ranking the 2nd highest.

At least three children die each day as a result of abuse or neglect. Children under five account for 85 percent of abuse deaths, while 45 percent are children under one year old.
Course Content

Statistics
Families with four or more children have higher rates of abuse and neglect, especially if their living conditions are crowded or they live in isolated areas.

Ratios
1:3 girls and 1:5 boys are sexually abused by an adult at some time during childhood. (Most sexual abusers are someone in the family or someone the child knows, not the proverbial stranger with a lollipop.)

Percentages
More than 80 percent of abusers are a parent or someone close to a child. Child abuse is far more likely to occur in the child's home than in a day care center.
