MAKE A TERRARIUM AT HOME TOO!

Step 1: Line your cup with pebbles.

Step 2: Add some dirt!

Step 3: Add a pinch of seeds.

Step 4: Pour in your water.

Step 5: Cover and watch it grow!

WHAT’S REALLY GOING ON?

THE WATER CYCLE.

Water from the ocean, lakes, and even grass evaporates into the clouds (and onto the ceiling of your cup) and falls to the ground as rain. The roots of the grass soak up the water and then it evaporates and starts all over again!

ENJOY EARTH DAY!
